A: We're really fortunate — our niche means that we work with some truly wonderful clients — those who are savvy, worldly and sophisticated — many of whom are creatives in their own right. Our clients know what they want and aren't afraid to experiment with ambitious design elements.

Q: What would you say is your single focus — the fundamental center of creating amazing homes?

A: Being easy going! This may sound surprising, but most of our clients work with us for almost a year — being approachable, friendly and easy to get along with is key if you're to form a close relationship that will secure the best, and most beautiful results..

Q: When was the last time you re-thought your processes and approach to your work?

A: I'm always taking on personal projects — this continually develops my understanding of what matters to my clients from a first-hand perspective, and how better value can be gained. This is just one way in which we're on a continual learning curve.

A: The OC and LA are two of the top real estate markets in the world — and we're so fortunate to work in such stunning surroundings amongst architecture that truly pushes us to advance our capabilities.
